Company Profile

Jagan Nath & Sons are the manufacturers of the famous STANDAS NO. 1 Sanaur and CHAND NO. 1 Sanaur Carpentry Tools and Files. It was incorporated in the year 1961 by its founder director Late Shri Jagan Nath Dhiman in Sanaur, a village near Patiala, Punjab (India). Later on the premises of the company were shifted to the Patiala city and at present, the company owns three manufacturing units in Patiala, Punjab (India), having state of art machinery and equipments. The company is managed by professional and experienced engineers and since its inception the company is well known for its high quality products and has been catering to the needs of Carpenters society across the country.

From past 18 years, Jagan Nath & Sons have expanded their operations in the field of Carpentry Tools by introducing new products to their product range like all types of Bench Planes, Spoke Shaves, Chisels, Power Tool Blades and Slim Taper Files etc.

The company had been continuously working for upgrading the standards of hand tools industry, using high quality raw materials and special high grade steels which undergo various tests before being transposed into finished products. It has in-house foundry and forging sections, latest tool room and heat treatment section and a separate quality assurance department having high quality testing equipments. Quality assurance department of the company ensures high quality and standard of each and every manufactured product.

R&D Department of the company is dedicated to foresee the future requirement of the industry and it is capable of developing new products, satisfying the needs of the carpenters.

The company has a vast network of distributors and dealers across India so as to ensure timely delivery of the products to its customers. The success story of the company lies in the hard work and dedication of entire team of skilled engineers and high end demands for its products.

BENCH PLANES

STANDAS No. 1 Sanaur and CHAND No. 1 Sanaur Bench Planes are derived from finest quality graded cast iron and are precisely made, fit and finished. Our Bench Planes are assembled with precisely machined frog and fitted with chrome nicked cast iron lever cap. Blade and chip breaker (back iron cap) provided is of highest quality. Body and frog are stove enameled black and are coated with stoving lacquer so as to prevent from rusting.

Handle and knob fitted are made of poly propylene plastic with silky smooth finish. Blades provided with the Bench Planes are tempered to 60-61 H.R.C. and are beveled to an angle of 28° for longer edge life.

STANDAS & CHAND Brand Bench Planes comes in various shapes and sizes depending upon the job required. 3 No. and 4 No. are ideal for finishing purposes, 5 No. is best for roughing and 6 No. is ideal for flattening purposes. Our range of Bench Planes also includes Bench Rabbet Plane No. 10, No. 33 and No. 78. No. 10 has open sides with a blade that extends to the full width of the body and No. 33 however is used in lighter cabinet works.

BLOCK PLANES

Block Planes manufactured are precisely cast and carved out of finest grey cast iron. Body is black stove enameled and cast iron cap is P.O. Red stove enameled. Blades used in the block plane are of high quality and sharpened to an angle, so as to give fine cuts and end grain. Product comes with the coating of anti rust stoving lacquer and are ready to use out of the box with minimal honing required. Our range product of block planes include No. 102, No. 110, No. 9 1/2 and No. 130.

No. 102, No. 110, No. 130 are low angle block planes which are easy to use and handle. Frog comes with fine quality spinwheel, so as to adjust the blade at the desire length.

No. 130 has a twin mouth, so as to use it from both sides. The same blade and frog can be adjusted in the opposite sides, so as to remove the remaining stocks of wood in the corner.

No. 9 1/2 has an adjustable mouth. The function is attained with the help of moving shoe in the base of the block which allows to adjust the mouth opening. Minimal opening for finishing and larger opening for rank cuts.

CHISELS

STANDAS No. 1 Sanaur and CHAND No. 1 Sanaur Brand chisels are single piece forging made from chrome vanadium carbon steel and has hardness of 60-61 H.R.C. Chisels manufactured are finished by hand and are specially heat treated to given an even carbide dispersion for keener cutting edge that lasts longer and are easier to resharpen.

All types of chisels provides more value for money as each one is hardened and tempered to within 1 inch of the shoulder. Blade for bevel edge chisel is ground to an angle of 25° and honed to 30° and comes with unbreakable poly propylene impact resistance handles. Back of bevel edge is ground flat and edges are square and parallel along the length.

However, mortise chisels are designed for cabinet making and are well balanced with parallel sides, more thicker than they are wide which help to keep them straight in cut.

Tools Tips

Tips for using Chisels

- Keep both hands back of the cutting edge while using chisels.
- Always shield the cutting edge when not in use.
- Always wear safety goggles when using a wood chisel.
- Never place a wood chisel in you pocket.
- Use the appropriate tool for prying and screwing not a chisel.

Tips for using Planes

- Use the appropriate planes for the work at hand.
- Use Bench Planes for stock removal, smoothing rough surface, truing and fine finishing.
- Use Jack Planes or longer planes for longer length planing (i.e. doors) to produce a straight line.
- Use block or trimming planes for end grain, where single handed working is required and to dress up short work.
- For optimal cutting performance, place cutter in bench planes bevel side down and cutter for block planes bevel side up. Always keep the blade sharp.
- Lightly oil the working surface after use.
- Rest the plane on its side when not in use.
- Store the plane with its cutter retracted to avoid premature edge wear.

Notes

Note:- All the products are manufactured indigenously in house by Jagan Nath and Sons and comes with replacement guarantee in case of manufacturing defects.
